Group Meditation Work

March 16th, 2010 through April 13th, 2010

The Macrocosmic Whole is all there is. Let the group perceive that Whole and then no longer use the thought, "My soul and thine." This is the demand for a sense of synthesis which is occult vision and not mystic vision. *The Rays And The Initiations* P. 115

April 14th, 2010 through May 13th, 2010

The power of the heart conquers absolutely everything. The heart may know the significance of far-off happenings. The heart can soar, fortifying the needed links. The heart can unite itself with the far-off worlds. *Heart, 74.*

The Valley Of Opportunity

What I am talking about here has significance for both our micro and macro lives. Each of us is a micro aspect of all of us. What is going on in our tiny lives is what is going on in the lives of our six and a half billion brothers and sisters.

While on the mountaintop in Capricorn we received our new orders. We were being reassigned to the Valley, but we already knew that. We turned our back on that Light Supernal and ventured forth. We passed through Aquarius where we loaded up on the Living Water, the energy

of Love for distribution to the “huddled masses”, still in

bondage in the valley, and still “yearning to breathe free”. In Pisces, we entered the gates of Gethsemane and made the sacrifice of all that might hinder the carrying out our mission. With resolution strong we turned our faces towards the ***Valley of Opportunity***.

If we look at a large enough hunk of the past, whether our own personal life or humanity’s, it becomes obvious that The Great Unfolding, what we call evolution, is a cyclical thing. It has peaks and valleys or inbreathing and outbreathing periods. Its motion is the motion of the sea. It has periods of ebb and flow between the peaks and valleys.

The flows which lead to the peaks are gradually accelerating periods of rising change and growth. Intense, highly energized, they are the last few months

before the birthing. They are periods of growing crisis.

The periods of ebbing which follow the peaks and eventually lead to the valleys are periods of relative consolidation during which the new expansions of consciousness, institutions and attitudes that were born in the peak are challenged by the old habitual and comfortable, even if painful, forms of life that try to reassert themselves. Very often, as the energies which birthed the change recede, erosion appears, and a loss of what was gained occurs. Sometimes the loss is great and

sometimes not so bad. But the periods do sometimes

appear to be a retreat, a falling back into a relative darkness as the old thoughtforms reassert themselves.

The valley, the bottom of the ebb period is the inceptive moment of vision. It is the space between two breaths. It is where water, air, and land come together in a great moment of deep silence. In truth, it is that doorway onto the mountaintop which is ever within reach of the seeking heart and willing servant. It is the space between two activities. “When water, land and air meet there is the place for magic to be wrought.” ***A Treatise On Cosmic Fire P.1014***

The peaks are actually the manifested expressions of the new level of consciousness that was acquired during that moment of silence in the bottom of the valley. To the degree that this new

understanding is embodied, it will be made manifest through the development of new institutions and social conventions that mirror it.

We are most often focused on the peaks of experience. They are physical dense manifestations, obvious, easy to see. However, it is what we do or do not do in the valleys which absolutely determines what can and, most probably, will happen in the peaks. It is in the Valley that the Lord of the Seventh Ray, ***The Revealer of Beauty***, begins His potent work. It is imperative that we, as a community of conscious meditators, become acutely aware of this cycle now.

2010 is a valley year. It is the beginning of such a three year cycle. We are just

beginning to enter it on the ebb of the high point reached in January 2009.

Although it is often difficult for our more form-focused brothers and sisters to see in the dense forms, headway in many subjective areas was nevertheless made during the ebb tide of 2009. The Aquarian Laws of Right Human Relations and Group Endeavor and the ageless Principles of Essential Divinity and Goodwill have solid footholds in the consciousness of a large portion of the planetary intelligentsia. This bodes well for our upcoming work.

During the ebb of 2009 we witnessed and are still witnessing a great struggle for embodiment of these principles and laws in forms that serve the Common Good

and the General Welfare. During this period, to maintain their positions the Forces of Retrogression, who also work in these cycles, unleashed a furious assault on the visions of liberty that were engendered in the valley of June 2007 and resulted in the election of President Obama who took office in the January peak of 2009.

We are now approaching the valley of 2010. We stand on the brink of the Spring Festivals of Aries, Taurus and Gemini which will bring us into the bottom of the valley: The place of silence, the space between two activities wherein magic is wrought.

It is in the Valley that the Lord of the Seventh Ray, The Revealer of Beauty, begins His potent work.

Our meditation work during these three opportunities is of paramount importance.

What we are able to contact in the silence, we will project into humanity's lower mental fields as principles, concepts, frequencies of Divine Law and Order. These frequencies will reinforce the work we have done in previous Valley periods. They will foster a more rapid and seamless expansion of consciousness by bringing in new Light and Love, thus enhancing the sensitivity for greater understanding of the concepts. These fresh energies carried on the wave of His Peaceful Silent Will and Loving Wisdom will be available for those of our brothers and sisters in the New Group of World Servers, and their name is legion, who are working at the level of form-building. Thus the One Work goes forward by the Way of the Christ and on the shoulders of

human beings through the hands and feet of our brothers and sisters the world around.

“The Star of Allahabad pointed out the way. And so We visited Sarnath and Gaya. On the way back, under the full moon, occurred the memorable saying of Christ.

During the night march the guide lost his way. After some seeking I found Christ seated upon a sand mound looking at the sands flooded by moonlight. I said to Him, ‘We have lost the way. We must await the indication of the stars.’

‘Rossul M., what is a way to Us, when the whole world is awaiting Us?’

Then, taking His bamboo staff, He traced a square around the impression of His foot, saying ‘Verily, by human feet.’ And making the impression of his palm, He surrounded it also with a square. ‘Verily, by human hands.’

Between the squares He drew the semblance of a pillar surmounted by an arc. He said: ‘O how Aum shall penetrate into the human consciousness! Here I have drawn a pistil and above it an arc, and have set the foundation in four directions. When by human feet and human hands the Temple will be built wherein will blossom the pistil laid by Me, then let the Builders pass by My Way. Why should We await the way, when it is before Us?’

Then, rising, He effaced with His cane all that He had drawn. ‘When the Name of the Temple will be pronounced, then shall the inscription emerge. In remembrance of My constellation, the square and nine stars shall glow over the Temple. The sign of the foot and the hand shall be inscribed above the Cornerstone.’” Illumination, II:V:5

Some 2000 years later, it seems clear that the name of the Temple is Love.

Another name I have for the Silence is the Sea of Solution. The solutions to the challenges that we are facing are not in form. They are in concept, principle. Consider: a principle is like a Sun. It is a field of intense radiation. Its radiation is magnetic. When, through an act of the pure reasoning will, it is projected into the lower mental plane, it attracts mental matter from that plane into its field and enables the Soul to generate an embodiment or form based on the essence of its magnetic radiation which is the energy of Love.

Our job as meditators is to contact these principles which swim in the Sea of Silence and bring them as purely as possible into the place where air, land, and water meet. That means that we must not allow our personalities, our personal and private feelings and opinions to become involved in the construction of thoughtforms. Our first assignment is to maintain the frequency of the principle and to populate, to fill the space of the lower mental field, with as many Suns of Silence as we can, to bring them in and then to consciously and continually strengthen and energize them by keeping our eye upon them so that they will grow and become ever more magnetic.

Releasing these suns into the mental field has a number of very beneficial effects for the implementation of the Plan. Their presence is of such strength and Light that they have a very powerful disintegrating effect on those

thoughtforms which serve as vehicles of the Great Lie. The destructive aspect works through magnetic radiation. The Life or Light of the Principle is so bright that it attracts that spark of life, that spark of its own divinity that is imprisoned within the alien formulation. It literally synthesizes or draws out and absorbs the life force from the false form. The matter of which the false form is constructed having no integrating life force dissolves and returns to the Mother.

Love is everywhere in manifestation all at once and all the time. Love does not sleep or get tired or bored.

When we project and maintain these frequencies into the lower mental field, they remain available as touchstones. The forms that we build are not one-size-fits-all solutions. The frequencies of the Laws and Principles are applicable to many situations and can be used to build a specific solution for any specific problem.

Any lover of humanity regardless of any present conditions can tap the energies of these concepts either consciously, if he or she has the knowledge of the alignment, or unconsciously as a simple reaction of the heart to need. This creative response to any soul-registered need will build a thoughtform that will meet the soul need of any situation. The required condition of the thoughtform builder is either the unconscious or conscious presence of a deep love for humanity and the pure sense of the soul to serve the Common Good and the General Welfare.

This is how the power we call consciousness or love wisdom works. Like the presence of the Father and the Mother, the Son, Love, is everywhere in manifestation all at once and all the time. Love does not sleep or get tired or bored. These are the Three which make up the One. They always and only co-exist, co-create and are.

So, we were called or invoked by the need of humanity at this point in time

and at the place which we now stand. We are, in effect, a part of the Hierarchical evocative response to this call. So, we have been sent.

We are equipped to save, to free those who have been for so long entombed in the cave of the Great Lie. We can and must express through our hands and feet, through our hearts and minds the Way of Love, the middle principle, the carrier wave of the Father's Intent to the Mother's Creative power.

Remember, we have legions of angels at our backs.
