The power of the heart conquers absolutely everything. The heart may know the significance of far-off happenings. The heart can soar, fortifying the needed links. The heart can unite itself with the far-off worlds. *Heart, 74.*

The Spring Offensive

The construction of the future will manifest the needed turn of consciousness. Regeneration of thinking produces its own fruits. Thus, construction of the future takes place by the saturation of space. Great is the time, and formidable. Fiery World III, #263

The task ahead of the spiritually minded people of the world today is to prepare humanity for the imminent and (perhaps) the greatest of all the Approaches. The method employed will be the scientific and intelligent use of Invocation and Evocation and the recognition of their tremendous potency. The Reappearance of the Christ, 152

Spring is a metaphor, a part of that greater metaphor we call Planet Earth, the creation of the Great Artist. Spring, like all metaphors, houses a message, a communication from the Artist. The particular message which Spring carries regards His deepest intentions. And, like most of His metaphors, this one is understood on only rather superficial levels.

Spring symbolizes many things to many people. On the most mundane level it is the time in the turning of the cycle when the snow and ice melt, when people remove their heavy winter clothing, the time to plant, the time when daffodils, hyacinths, tulips, all seem to shoot out of their winter graves overnight. On a deeper level, it was Spring when the Christ, the Flower of the Morning, rose, just like the lilies of the fields, from His tomb. Thus, Spring for many of us, eternally signifies resurrection.

Still, because of our intense and ages-long identification with dense physical reality—with our form life—resurrection, the metaphorical core of Spring, is not understood on a very deep level either. We see it as something that reportedly happened to one person, the Christ. But

there is no real sense of the deep significance of this event.

For some, not that many, there is a deeper message within the metaphor. Death, Spring teaches us, is not just an ending. It is a harbinger of resurrection. This is the significance of His message.

So, what we are actually celebrating in Spring is the eternal triumph of Life over Death through the process we call resurrection. Under centuries of form identification, the knowledge of this basic fact is buried deep within the human psyche. In all of history, this cycle of death and reappearance is obvious. It is an indelible part of the macro and microcosm of our lives.

Today, much of humanity is in turmoil. We are bewildered, gripped by forces which terrorize us. If we can understand the lesson of Spring and can view today's unfolding events for what they are, we will have a better idea of what is happening and how we can assist.

To do this, we need a bigger perspective, an eons-long view. However, we are so immersed in our form life that we do not

readily see the larger picture of the Great Unfolding. We see the cycle of the year or even of three years, and we forget that there are cycles in the Great Unfolding that require centuries and eons to complete. We need to step back. We need to gain the larger view.

A long time ago in Atlantis, something was broken. Something died. Is it so difficult to see that humanity has been moving toward the resurrection of that Death for many long eons?

We expect things to happen quickly in terms of our myopic sense of time. But suppose that the appearance of the Christ those two thousand years ago was a sign, a message. What if the message was that the resurrection for which the One Humanity has been working for eons was beginning to manifest on the dense physical Plane?

What if this present unfolding event we think of as the reappearance of the Christ is not just His reappearance, but a global resurrection? What if the externalization of the Hierarchy and the Reappearance of the Christ establishes once again the recognition within human minds of the seamless nature of reality? What if we are talking about the reunification of Hierarchy and Humanity as a conscious fact in the minds of men? What if this is the resurrection of that which died those eons ago in ancient Atlantis.

And so, we arrive at D-Day.

Spring is taking over. The annual, ever reoccurring Spring Offensive is underway. We are initiating the next drive in our age's long, ceaseless effort to resurrect

Humanity, and thus the Planet, from under the shadow of the Great Lie in which it has been entombed and into the sunlight of Truth . . . from the darkness to the Light, from the unreal to the Real and from death to Immortality.

Although we spend a lot of words talking about the externalizing Hierarchy and the reappearing Christ, we seldom recognize these are two aspects of a single event. It is the inexorable unfolding of this single event that is generating that almost overwhelming sense of impending opportunity which many of us are experiencing.

Everything that is occurring now is occurring in a great cyclical pattern within the orb of this unavoidable tsunami, the resurrection of Life we call the Externalization and Reappearance.

Humanity has been engaged in a world-around struggle with those forces of materialism who oppose the evolution of the planet. The current struggle is not a new struggle. Though the Great Unfolding cannot be stopped, it still involves the ongoing effort of these retrogressive forces to pervert the evolution of Humanity by projecting the Illusion of the Great Lie into the unfolding Age.

This eon's long situation is rapidly approaching, if not the end point, a beginning of the end point. Since the founding or birth of this nation, which was like a beachhead in the New Age, we have steadily approached this place in our collective destiny.

The New Old World

We should realize that not all of the pilgrims who came to this New World, actually the site of Ancient Atlantis, during those first 50

Spring is taking over!

years or so were carriers of the new consciousness. There were plenty of old consciousness folks on board those tiny ships. And, over the past 230 or so years, as we have strived toward fostering liberty and freedom, the Common Good, and the General Welfare which were and are the promise of the New Age, we have been engaged in almost constant struggle with these old consciousness forces of retrogression.

The outlines of this struggle are easy to see. The birthing and passing of the Constitution

was a mighty struggle. The ongoing political struggles for supremacy of the governance of the nation have been ceaseless and today are particularly vicious. The outlines are also quite visible in the dense physical wars that we have been waging during these growing years with the forces of materialism.

The victory of the North in the U.S. Civil War was the linchpin of our entry into the New Age. Regardless of everything else, this victory underscored in blood the Principle of Essential Divinity and the Law of Right Human Relations as bedrock aspects our daily lives. Since then, we have twice joined the global effort to stop the forces of exclusivity, superiority, and materialism from dominating the planet. Up to today, we are still engaged in thwarting all efforts of these forces to control on the dense physical plane through the force of arms.

This struggle, this battle, as we well know, is not just a dense physical thing. It is being carried forward on all planes of human

existence and in all departments of human life. Over the past 45 years or so, while simultaneously maintaining a constant state of physical warfare in many places around the world, the forces of materialism have made major gains on the dense physical plane by using weapons other than the force of arms.

I do not need to list their victories. Anyone who is reading this document sees and hears of them on the internet and television daily. We are all familiar, even intimate, with the details of the

destruction of life and happiness that have been engendered through the use of hate, fear, greed, and avarice because these details involve ourselves or our immediate families and friends.

What is not so well known or understood outside of groups such as this one is that the battle rages, as well, in the Planet's subtle dimensions. Thus, in this Age, on this day, we have been called to serve in those dimensions. We will encounter the Forces of Retrogression on the seething, roiling, bleak planes of the astral field and the incoherent, discordant, confusion of the mental field.

Our objectives are simple. They always are. We will bring the frequencies of love and light, serenity and transparency to the astral fields. We will seed the mental field with the frequencies of the Pure Reasoning Will: Coherence, Harmony, Concordance, and above all, Joy and Beauty.

We were called into incarnation by the deep and powerful invocative cry of our brothers

We were called into incarnation by the deep and powerful invocative cry of our brothers and sisters.

and sisters. We were called now because we are pledged and experienced Souls. We were called because we are needed now, and we were sent.

We are needed, and we are skilled from much previous experience in the kind of warfare that is raging on these dimensions. We understand the issues. We know well the opponents. We know and understand our mission, our assignment in this One Work. From the Beginning, they struggled. From the Beginning we triumphed, and we will do so once more, and this time, in the light of our victory, we will see the sunrise of the New Epoch.

When I use the term **our** assignment or

mission, I am talking about a relatively small but powerful section of the proactive forces of Light. I am talking about the conscious and committed members of the Outer Community. I am talking about US.

What we are suggesting here is a kind of battle plan for the next cycle. We are initiating it with this Spring Offensive. Our primary efforts are not and will not be focused on the dense physical plane. This phase of the Plan will culminate in victory in Scorpio where all things are ultimately tested.

The vast stretches of the Piscean era have been dedicated to the monumental task of building—rebuilding, actually—the bridge of light between the human brain and the heart of the Christ, the Generator of the Plan, the point of Light and Love within the mind and heart of God. This has been accomplished. The evidence of its

existence is the growing presence of Christ Consciousness or group consciousness within the human family.

Some 170 years ago, Ralph Waldo Emerson pointed out that every man has a personal pipeline to God. Many, many millions of Souls have awakened to their spiritual identity, and after many incarnations of development, they know how to connect with that inner reality. This is a growing fact in consciousness.

With this growing ability to “go in,” Humanity gradually

developed the ability to “go out.” Service to the Greater Good and the General Welfare is the indelible

sign of Soul presence. Rather than the countless wars and endless parades of kingly self-serving personalities, the evidence of this service is the true story of human history. It is the story of the expansion of the Truths of Life which form the core concepts of those documents that have tended toward the manifestation of the principles of freedom and the fact of the One Humanity and the importance of the individual.

We know the Way into the Silence. In the past 2 to 3 hundred years, we have turned our attention more and more to the service or embodiment side of the Path or the Antahkarana. Today, with the wind of the incoming Seventh Ray Lord, *The Revealer of Beauty, The Bestower of Light from the Second Lord* behind us and the reappearance of the presence of the ancient Ashram of Synthesis, we are

We are not concerned with destroying the Darkness. We are concerned with raising the Light. In the Light, the Darkness must go.

focused primarily on the work of embodying the Suns of Light we encounter within the Sea of Solutions we call the Silence.

This is our new work. These are the battles to which we are now called. Shield and lance still prevail; however, they have become the frequencies of Truth and Beauty and the Love and Joy that always links these two. While we never drop our vigilance, and we are well aware of those forces which oppose the Light, we focus our efforts on releasing the Light into the Darkness. We are not concerned with destroying the Darkness. We are concerned with raising the Light. In the Light, the Darkness must go.

As I said, our objectives are very simple. Our will is directed toward the purification of the astral and mental planes. Our primary tool in this effort is group creative meditation. Our power source is the Pure Reasoning Will of the Father and the Loving Wisdom of the Christ.

The primary struggle in this nation is, I suspect, similar to the primary struggle in all nations just now, and that is the struggle over the nation's governance. Dominating the governance of the United States has long been the focus of the Forces of Retrogression. We are, therefore, particularly concerned in this Spring Offensive with the upcoming national elections for the House of Representatives and the Senate and all State, County and City elections as well.

What we suggest here is a template. The objective is to seed the mental plane of this

nation with fiery Suns of Silence, driven by the Pure Reasoning Will of the Father, and through the Loving Wisdom of the Christ, to bring clarity and serenity into the emotional planes. All of our meditation efforts will be directed toward supporting the principles and laws of human life. The simplest inclusive keynotes for these Principles and Laws are The Common Good and the General Welfare.

In addition to the seeding of the mental plane with Suns of Silence and the astral plane with visions of loving kindness and forms which serve the Common Good and General Welfare, we are seeing men and women of goodwill, men and women whose

The simplest inclusive keynotes for the Principles and Laws are The Common Good and the General Welfare.

motivation is service to humanity, men and women

who serve the Common Good and General Welfare, being magnetically attracted and involved in the process of governance by the Suns of Silence. We are visualizing these brothers and sisters being elected in the 2010 elections to public offices in all levels of government.

We are envisioning this, creating it as a thoughtform and launching it into the astral field. We will not, cannot will this into form. We must let human free will work. Our visions of truth, of loving kindness, of equilibrium, or what we call justice, will attract their own astral forms and find their way into manifestation. This is the Law.

Although it will be nuanced by the various cultures, the basic issue facing the One Humanity just now is pretty much the same in every nation. It is, simply, who is going to run the program, the forces of greed and

exclusivity or the forces of the Common Good and General Welfare. While there are still nations in the world which have not reached the level of enlightenment which public elections reflect, in most nations, the answer to this question boils down to some sort of an election.

In the U.S. the next crucial round of elections will occur in November or Scorpio of 2010. And thus our battle plan for the Spring Offensive which focuses our forces as we have outlined above. As I said, what we suggest here is a template. Something like it would be helpful in most nations.

Finally, I would like to share a few words from Master M. with you all.

Everyone must think about the reconstruction of the World, for when we apprehend what is taking place, we grasp the approach of the future. Each thought directed to the construction of the New Epoch will provide its own forms. Thought-forms manifest the trend of the future; hence it is needful to understand the chain of saturated strivings. Creativeness of spirit is as a fiery lever in space, as a powerfully impelled fiery creator, as a ruler in space, as a great saturating Fire. Thus, one who thinks about preeminence and about the great future molds an affirmation of constructiveness. Space must be cemented with fiery formulas and fertilized by the manifest fire of the spirit. On the path to the Fiery World let us manifest striving for understanding of the reconstruction of the World. (*Fiery World III*, 169)

The Triumph of the Light

Just as
Long ago in Galilee
Flowers sprang spontaneously
From where He touched his foot or pressed his knee
On the damp spring soil,
It is the renewing glance of his eye,
I say,
That causes the mustard weed to germinate,
And,
shooting through the pea green grass, to dominate
The undulating hills
with a chrome yellow cover of brightest joy.
And,
It is the brush of his zephyr breath
That calls forth the tulip's bloom
And liberates like Lazarus the lilies
From their dark winter tombs.
