Regarding The Need For Immediacy

by Tom Carney

Workshops/Classes (To participate, please call to arrange a meeting)

- ▶ Building the Lighted Way - Sundays @ 9:00 AM
- ▶ White Magician Training - Wednesday Evenings @ 7:30 PM

Online Workshop/Class/Group Meditations (Please call to join)

- ▶ New and Full Moon meditations (To sign up for notices e-mail vezkuhl@gmail.com)

Group Meditation Work

December 22, through January 20, 2015

Whoever loves flowers is on the heart's path. Whoever knows the striving to the summits is on the heart's path. Whoever thinks purely is on the heart's path. Whoever knows of the highest worlds is on the heart's path. Whoever is ready for Infinity is on the heart's path. Thus shall we summon all hearts to the realization of the Source. It is correct to understand that the substance of the heart belongs to the Subtle and also the Fiery World. One can perceive worlds within the heart, but not within the mind. Thus, wisdom is contrary to intellect, yet it is not forbidden to adorn the mind with wisdom."Heart #390

January 21, through February 18, 2015

The clue to the initiation of the Transfiguration can be of importance, as it involves the personality, and many of you in the not so distant future (from the angle of the aeonial life cycle of the soul) will face that. The secret of the third initiation is the demonstration of complete freedom from the claims and demands of the personality. It does not involve the achievement of a completely perfect expression of the spiritual life, but it does indicate that the service of the initiate and his life demonstration—regarded in a broad and general way, from the angle of the life-tendency and of entire dedication to humanity—remains untouched by the limitations, still existent, of the personal lower self. The Rays And The Initiations P.44-45

Regarding The need For Immediacy

In the yearly cycle, we have entered the Pause between the outbreak of the Libra, Scorpio, Sagittarius cycle and the inbreath cycle of Aries, Taurus, and Gemini. As we know, it is in the pause between the breaths that the work is done. In the present Capricorn, Aquarius, Pisces pause cycle, we have come out of the inbreathing cycle (from new to full moon) of Capricorn. For a short time we pause to assimilate the download from the Capricorn full moon. This, of course, is the purpose of the final two days of the five day full moon cycle. We then enter the outbreathing side of that cycle. It is the outbreathing side of the Capricorn cycle that is of importance to us at this time.

May 2014 through May 2015 was/is the first cycle in the New Group of World Servers three year cycle. *Discipleship In the New Age* P. 165 The emphasis of this cycle is on conditioning the field for the impact of the manifesting Principle. We have, since the inputs of the Taurus Festival last May, been focusing all efforts on the ever growing demand of humanity for freedom and equality. That work went forward from last May and culminated in Sagittarius, 2014. In Capricorn we reach the mountaintop of initiation which is always a ceremony of completion and beginning, for there is never one without the other. We rededicate ourselves and,

turning our backs on the Supernal Light, we return to the task of world salvage.

In turning our backs on the Supernal Light, we bring the journey full circle. The turning is not some heroic act of self sacrifice. It is totally practical and entirely necessary if we are to be of any use in the coming cycle. The turning is a conscious shift of focus, a shift from the light of revelation to a vision of the current problems and obstacles which are impeding the unfolding of the Plan, and which demand immediate action.

“The measure of understanding is the degree of love. One can memorize lines word by word, yet one remains dead if the knowledge has not been warmed by love.” Agni Yoga #424

The exposure to the Capricornian Light is in the way of an upgrade of our psychic energy and equipment that enables us to see and understand more clearly just what the problems are and what the available paths to solution entail. This upgrade, or purification of our vehicles, if you like that language, functions on micro and macro levels. That is, we can see and understand the problems of the individual people with whom we will be dealing as well as the larger group or national issues involved.

The ability to better and better see and understand these micro and macro issues is the evolutionary result of gradually bringing the heart on line. The evolution of consciousness is the movement of the focused awareness of the individual and

the entire group from the mind/intellect to the Heart. As we know, "The measure of understanding is the degree of love. One can memorize lines word by word, yet one remains dead if the knowledge has not been warmed by love." **Agni Yoga #424**

Everyone knows that the Ray energies coming through this sign of the cycle, Rays 1,3,5, and 7, are all along the "power" line. It is good to recall that all of these Rays are aspects of the Cosmic 2nd Ray of Love Wisdom. The First Ray aspect of the 2nd Cosmic Ray of Love Wisdom is Pure Reasoning Will. It is Love with a Purpose, Love with an Intention. It Drives the Cosmos. It will not be denied.

As returning warriors, our major goal is to help humanity move or evolve from the mind/intellect focus into the Heart/Wisdom focus. Salvation lies along the Path of the Heart. Only the walking dead do not feel the pressing need for action!

The mind/intellect focus was/is one dimensional. It is limited to the lower mental form worlds of the dense physical plane. It is this overriding focus which has largely produced modern civilizations. From this point of view of reality, we simply could not see the inner goals of the Plan which exist as formless Principle in a multidimensional reality.

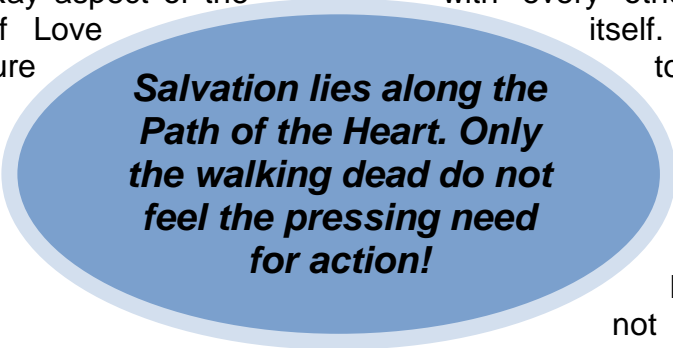

Fortunately there have always been a few evolved brothers and sisters in incarnation who could see the Way Forward, and who, through mighty struggles and much pain

and suffering, managed to keep Humanity moving on the Middle Way or the Way of the Heart.

The mind/intellect focus created foundations for the world that it was able to see and comprehend from its limited point of view. Consequently our modern civilizations rest on foundations of illusion and ignorance, of competition and separation that place every being in all the kingdoms in a never ending death struggle with every other being and Nature itself. These foundations totally ignore the Cosmic Principles of Unity, Freedom, and of Equality and Justice, viewing these Principles as Idealistic dreams and not of the real world.

These assumptions are the foundations of the Great Illusion that has held us so long as prisoners on our Planet.

Our mission is to move Humanity onto the Heart Path, or the Path of Wisdom. "One should know how to conquer the illusion of contradictions. It is needful on the one hand to cultivate kindheartedness and on the other to understand austerity. For many, such a task is completely insoluble; only the heart can prompt when the two qualities will not contradict each other. The heart will prompt when it is necessary to rush to the help of one's neighbor. The heart will indicate when to stop short the madness of a fierce animal. It is impossible to express in a word of law just when the necessity of this or that action becomes evident. Unwritten are the laws of the heart, but only therein does justice dwell, for the heart is the bridge of the worlds....

The sword of knowledge flashes at the command of the heart. For the heart there will be no contradiction. **Brotherhood #121.**

The problems we are presently facing on the planet seem, especially to the weak hearted, insurmountable. While they may be enormous, actively deadly, and potentially totally destructive, they are all solvable. It would be incompatible with the Laws of Cosmic Physics to face Humanity with an insurmountable problem. What would be the point?

However, while solvable, we could also fail, and, as we have again and again, face the unavoidable results. Humanity has been on this very un-merry-go-round for centuries. So, if it is inconceivable that Cosmos would posit problems that are unsolvable, what explains our long, long history of utter failure?

Precisely the lack of the Heart.

The above is a macro example. Yet the same issue is present on the micro level. When focused in the heart, one can see the inner deeper problems not only one's sisters and brothers, but of one's own inner worlds as well. "For the heart there will be no contradiction." **Brotherhood #121.** We will know, "when to speak and when to be quiet.", and we will know what to say.

In those instances where we have failed to correct our own shortcomings or to help and even hurt others, it is quite likely that

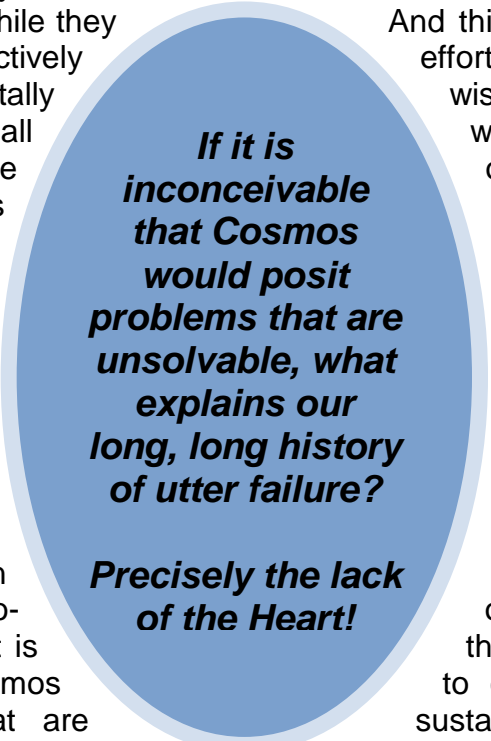

we were using our vaunted intellects to guide us rather than our all seeing hearts. "One can perceive worlds within the heart, but not within the mind. Thus, wisdom is contrary to intellect, yet it is not forbidden to adorn the mind with wisdom." **Heart #390**

And this, the conscious, deliberate effort to adorn the mind with wisdom is our goal beginning with the Capricorn outbreathing cycle, and through the now initiated yearly cycle of 2015.

Every organism has a system for the circulation through the system of whatever Life force keeps it in manifestation. In the human body, this is the four chambered blood pump we call the heart. In our larger body, Humanity, the system that is supposed to circulate the energy which sustains us is called the economic system.

The principles which govern our four chambered blood pump and those which govern our economic system are very different. Our hearts work on the Cosmic Principles of the Common Good. Every part of the body is supplied with the life giving fluid because the body is a single unified field that works through cooperation and harmony. Any blockages in the supply of the life giving fluid to any part of the body can and frequently do result in cardiac arrest, or death.

Our economic system, called Capitalism, functions in reverse of this process. Because of the assumptions regarding

***If it is
inconceivable
that Cosmos

long, long history
of utter failure?

Precisely the lack
of the Heart!***

reality or the “foundations” upon which it rests, it works on competition for the blood supply which we think of as natural resources and “money” or wealth. Rather than a cooperative and harmonious nourishing of the whole, the goal of our economic system is for each person, with a total disregard for the Common Good, to get as much of the blood as he or she can.

Whatever portion of the blood supply one can encumber is sequestered from the whole and is viewed as one’s exclusive personal property, his or hers to do with what they will. It takes no great mind to see that this system creates huge blockages in the circulation of blood through the system. We are literally on the brink of a planetary cardiac arrest.

The problem with this system is not Capitalism. The problem is Competitive Capitalism. Capital is the energy, the Life, driven by Intention, the force that Will initiates. Capital is the blood of any system.

As I said, the problem lies in those illusory foundations upon which the system is based and which generate fear, hate, and a fierce, no-holds-barred, kind of competition for the ignorantly assumed limited blood supply. Another program grounded in the same shattered foundations that tries to redress the insane imbalances of this diseased system will at best provide a

temporary period of relief for some. It will not “fix” this situation. An unquestioned shibboleth of the system is that, “the poor will always be with us.”

“Adorning the mind with wisdom” which for the last 500 years or so has really been our primary mission, will result, not in the elimination of Capitalism, but in the creation of Cooperative Capitalism. This will be an economic system based on the same Principles of Cosmic Physics which govern our own bodies. It will be a cooperative system based in the endlessly demonstrable fact of abundance, of the inexhaustible supply of energy.

“Adorning the mind with wisdom” will result, not in the elimination of Capitalism, but in the creation of Cooperative Capitalism.

Cooperative Capitalism will regulate and circulate our blood or energy, the naturally occurring planetary resources- including the intelligence and love of the One Humanity which is now not even recognized as an energy source- for the sustaining of the Common Good of all people and the Planet Herself. It will relieve us of the lead weights of scarcity, of the fear driven need to grasp and acquire, of the idiotic notion that a human being can have an exclusive “ownership” of energy, of property of any kind. It will lead us into our correct role as loving custodians of the planet.

We have seen great changes in many areas of our planetary Life. Most of the changes in terms of quality of life have gone to a very small percentage of our 7 billion sisters and brothers. Many of those who have been fortunate enough to have some security and a decent "standard of living"-the so called "middle class"-who have preferred not to be involved or even aware of the sad plight of those who were and are not so fortunate are seeing their security and standard of living being eroded and threatened by the increasing imbalances in our Global Life.

The recent elections in the United States, which saw a further huge erosion of the people's power, will accelerate and exacerbate these conditions.

This added incentive was apparently necessary to awaken us to the absolutely serious nature of the situation. As we know from numerous experiences, there is

As we know from numerous experiences, there is nothing like a huge unfolding disaster to call out the Soul!

nothing like a huge unfolding disaster to call out the Soul, the soul of an individual, the Soul of a Nation, the Soul of the One Humanity. We know the Heart Path that leads to the birth of a new civilization. The Master advised, "I consider it needful to distinguish between recurrent and non-recurrent things. One may put aside an object of daily life, but one must seize upon the calling dates without delay. It may be affirmed that a moment of cosmic possibility is irreplaceable....Those who know Me realize the significance of immediateness, but the new ones must keep this law in mind if they wish to draw near. Verily I say, the time is short! I say with solicitude, lose not an hour, for the threads of the ball are multicolored. Not in the pleasantness of repose but in the darkness of the storm is My Voice useful to you. Learn to harken!" Community #64
