The Long View

Human unity, human understanding, human relationships, human fair play and the essential oneness of all men—these are the only concepts upon which to construct the new world, through which to abolish competition and to bring to an end the exploitation of one section of humanity by another and the hitherto unfair possession of the earth's wealth. As long as there are extremes of riches and poverty men are falling short of their high destiny. *Problems of Humanity* p.83

The neighborhood in which I live is home to a large number of Jacaranda trees. Years ago, I became enthralled with how these trees bloom in the spring. In a matter of weeks, they literally explode from a bunch of relatively bare branches into clouds of violet blossoms. If we pay attention to the Plant Kingdom we will see this slow-motion explosion occur over and over again, not just in the tulips, daffodils, hyacinths, and gladiolas but in practically every living thing in the Kingdom from the Giant Sequoias to the grasses of the plains. Take the high desert just east of Los Angeles for example. Overnight it seems, it turns from a sea of tan and brown into greenish yellow waves of grasses. These Spring into myriads of huge pond like appearances of orange poppies, blue and red somethings, and little yellow pools of gold.

One day some years later, while observing the Jacarandas explode, I experienced another one of those lightening like flashes that seem to occur in an endless second outside of space and time that let me understand this ever recurring explosion of Spring. I was standing under a huge

Jacaranda and looking up through the violet cloud of its canopy, when I realized that this was a part of a multidimensional cycle that has been going on forever. And, not just in the plant Kingdom, but in all aspects of the Human Kingdom as well.

to this comprehension of the Great Unfolding. We have literally had our heads buried in the ground, the three dimensions of the physical world, and been oblivious to the timeless unfolding

of Cosmic Intent.

We are fused into the 3D moment, and we have been oblivious to the explosion of the evolving Plan because we have been unable to encompass anything like a multidimensional Cosmos or a time span greater than a few months, let alone a couple of thousand years or so in our vision. Thus many of us cannot see that we are already rather deeply involved in a hugely significant explosive period of the unavoidable unfolding of the Creator's Intention.

This period, which probably began its visible dense manifestation in 1215, some 900 years ago, with the signing of the Magna Carta, involves an expansion of consciousness for Humanity unparalleled in all of our previous History. With brief interludes called peace, here and there, the Planet has been primarily a huge battlefield on which various self-appointed members of the then 1%ers, who in those earlier centuries called themselves Royalty, engaged in ego driven Wars with one another, using the masses of peasants, who were no more than property, to do the actual fighting and dying. Thus did we unwittingly implement the plan of the retrogressors.

The inevitable effects of these constant wars where the people suffered and died, and the royalty lived in relative luxury, generated a steady if not very evident, increase in the awareness of people about the concepts of liberty and freedom. Spring is ever recurring, and as consciousness gradually expanded, these Ideas gained in power. More and more people were able to see the wars and the class systems that supported and generated them as aberrations in opposition to freedom and liberty.

Thus, the continuing expansion of consciousness, through larger and larger numbers of human beings unavoidably led to revolutions and wars. However, these wars were not being waged for ego satisfaction and "spoils". They were the

only avenue available that would lead to independence and freedom.

For the first 500 years or so, the obstacles to the expansion of consciousness--enormous, deeply entrenched thoughtforms of ancient evil design--required much inner building to create a center powerful enough to begin to manifest the new Ideas. However, the manifestation process has been greatly

accelerating for the past few hundred years. As Master M has indicated, "Consciousness grows by synthesis; it cannot move forward in a narrow manner. Advancement of the consciousness will proceed from the center encompassing successive circles of new understanding." **Aum #88**

Consciousness expands through a process of synthesis which creates greater and greater areas of Unity within Humanity.

Although there is no specific data as to when it happened, I suspect that the appearance on our Planet of the Avatar of Synthesis had/has a lot to do with this acceleration. "The energy of Synthesis is a new energy, a new force, and a new substance. Its Purpose is the building of a new civilization which will carry the Evolutionary Plan for humanity into manifestation." **Ashramic Projections P 173** Master R sums up the effect of the synthesis energy this way: "Conflict in the extreme, followed by quick evolutionary change will manifest wherever the

Consciousness expands through a process of synthesis which creates greater and greater areas of Unity within Humanity.

Synthesis energy is applied.” *Ashramic Projections P. 174*

It seems likely that many of the events of the past 150 years or so are examples of the application of the synthesis energy. Take for example the wars that have consumed our lives during this brief period: The U.S. Civil War, 4 years 700,000 to 900,000 dead **Wikipedia**; WW1, 4 years--16,000,000 dead **Wikipedia**; WW2, 6 years --73,000,000 dead.

The Civil War eliminated Slavery from our Constitution. The huge cost of the sorrow, pain, and loss of both life and infrastructure from the world wars of the 19th century generated a great synthesis in the nations of the world resulting in the United Nations. The creation of the UN was a huge evolutionary leap.

Also, these wars generated a huge expansion of human consciousness that revealed the fact of the One Humanity, for no one was untouched by the awful consequences of the insanity we call war.

Perhaps the most significant “evolutionary change” which these wars (with the Korean and Vietnam wars as little reminders) have taught us is that the Path forward cannot be traversed through war. War leads unavoidably to a dead end for Humanity. This lesson, it seems to me has been learned by huge numbers of enlightened humanity, and to this day, in spite of an unending effort by the

Retrogressors to generate it, we have avoided another world conflict on the dense physical plane.

It is true that Humanity is today involved in a final war with the Retrogressors. These battles are pretty much confined to the emotional and lower mental planes, and although they still generate a terrible level of planetary suffering, they have been largely kept off the dense physical plane. We will of course win these wars. This is evolutionally unavoidable. “From the beginning the dark ones struggled. From the beginning we conquered.” *The Call #231*

The Path forward cannot be traversed through war. War leads unavoidably to a dead end for Humanity

For those conflicted with the “head in the sand” condition, the world situation seems very bleak. However, it is clear from the long view that Humanity is

being steadily triumphant in this War of mind and Heart. In spite of certain levels of what might be called “back sliding” and the efforts of the Retrogressors to block and hinder the United Nations from becoming a source of sane solutions to world problems, the synthesis energy empowered by the growing conscious awareness of the One Humanity has continued to grow among the peoples of the world.

Blocking and hindering on physical, emotional, and lower mental level is all that the Retrogressive forces are able to do. They do not have the collective power to actually stop the Unfolding. Every negative and hateful action, they generate, every sad situation such as the presence of

millions of suffering “refugees” only serves to further the realization among Humanity that those are our children, those are our sisters, brothers, wives, husbands, mothers and fathers dying of starvation and brutality.

The Heart is moved to action.

These evolutionary changes being generated through synthetic understanding are evident in the expansion of inclusiveness and actual appreciation and celebration of human diversity in terms of race, sex, and cultural differences. All of these former sources of polarization and competition are continuing to be synthesized into a celebration of the One Humanity. The synthesis energy produces through the absorption of the negative ancient driving forces from the unconscious—the inborn needs of competition, to be better than—and the positive energies of right human relations to a kind of recognition and awareness which demonstrates through attitudes and behaviors of Kindness and the celebration of, rather than fear of, differences.

We are at long last, as a people, learning to love one another rather than to fear each other as potential enemies. These realities are appearing in what we call social media. Social media like Facebook is a **huge synthesizing energy field** which brings together polarities of many points of view.

Humanity appears on Face Book. We see and hear incredible performances by people from every corner of the globe. We are made aware of the humanness and

kindness, gentleness, beauty, and the courage of humans like Malala Yousafzai, and the qualities of people of all races, sexes, ages, and cultures. I saw a 5-year-old boy conduct Beethoven. Like 4 million others, I watched a beautiful Russian woman play the Jaw Harp. And somehow after a few minutes or so I always come away with a deeper realization of that interlocking quality which makes us all human and all one, the awareness of the presence of what is call Soul.

Beneath the eons of layers of matter, we have discovered, and are learning to identify with, “The Soul, the form-building principle, producing attraction and cohesion... the soul or qualifying principle, the builder of the forms.” *A Treatise On White3 Magic P 333,4* Well, as I said, we are already rather deeply involved in a hugely significant explosive period of the unavoidable unfolding of the Creator’s Intention. It is good to be aware of what is going on. When we are conscious, we can enjoy the trip. When there is nothing left to transmute and nothing left to transform, we are transfigured, or to make it really simple, we know who we are.
